Regulatory Information

An investor should consider the investment objectives, risks, charges, and expenses of Direxion Shares carefully before investing. The prospectus and summary prospectus contains this and other information about Direxion Shares. To obtain a prospectus and summary prospectus, please visit www.direxionshares.com. The prospectus and summary prospectus should be read carefully before investing.

Investing in the funds may be more volatile than investing in broadly diversified funds. The use of leverage by a fund increases the risk to the fund. The more a fund invests in leveraged instruments the more the leverage will magnify gains or losses on those investments. There is no assurance that the Funds will achieve their objectives and an investment in a Fund could lose money. No single Fund is a complete investment program. The Funds are not designed to, and will not necessarily, track the underlying index or benchmark over a longer period of time.

The Funds are not suitable for all investors. The Funds should be utilized only by sophisticated investors who (a) understand the risks associated with the use of leverage, (b) understand the consequences of seeking daily leveraged investment results, (c) understand the risk of shorting and (d) intend to actively monitor and manage their investments on a daily basis. Investors who do not understand the Funds or do not intend to manage the Funds on a daily basis should not buy the Funds.

The risks associated with the funds are detailed in the prospectus which include: adverse market condition risk, adviser's investment strategy risk, aggressive investment techniques risk, concentration risk, counterparty risk, credit and lower quality debt securities risk, equity securities risk, currency exchange risk, daily correlation risk, daily rebalancing and market volatility risk, depository receipt risk, foreign and emerging markets securities risk, sector securities risk, interest rate risk, inverse correlation risk, leverage risk, market risk, non-diversification risk, shorting risk, small and mid cap company risk, tracking error risk, and special risks of exchange traded funds.
