Investing in the Funds may be more volatile than investing in broadly diversified funds. The use of leverage by a fund means the Funds are riskier than alternatives which do not use leverage. These Funds are not designed to track the underlying index for a longer period of time.

There is no guarantee that the funds will achieve their objectives. The ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investments. Due to the daily nature of the leverage employed, there is no guarantee of amplified long-term returns.

Risks:

An investment in the Funds involve risk, including the possible loss of principal. The Funds are non-diversified and include risks associated with concentration risk that results from the Funds' investments in a particular industry or sector which can increase volatility. The use of derivatives such as futures contracts, forward contracts, options and swaps are subject to market risks that may cause their price to fluctuate over time. The Fund does not attempt to, and should not be expected to, provide returns which are a multiple of the return of the Index for periods other than a single day. For other risks including correlation, leverage, compounding, market volatility and specific risks regarding each sector, please read the prospectus.
