\*\*Rafferty has contractually agreed to waive all or a portion of its fees and/or reimburse the fund for expenses through April 1, 2013, to the extent that the funds net annual operating expenses exceed 0.95%.

*There is no guarantee these funds will meet their stated investment objectives.*

## Disclosures

Shares of Direxionshares are bought and sold at the market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally determined) and do not represent the returns you would receive if you traded shares at other times. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense subsidies and waivers in effect during certain periods shown. Absent these waivers, results would have been less favorable.

***An investor should consider the investment objectives, risks, charges, and expenses of Direxion Shares carefully before investing. The prospectus and summary prospectus contain this and other information about Direxion Shares. Investing in the funds may be more volatile than investing in broadly diversified funds. The use of leverage by a fund increases the risk to the fund. The Funds are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged investment results and intend to actively monitor and manage their investment. The Funds are not designed to track the underlying index over a longer period of time.

### Risks:

The risks associated with the funds are detailed in the prospectus which include: adverse market conditions risk, adviser's investment strategy risk, counterparty risk, credit risk, currency exchange rate risk, daily correlation risk, derivatives risk, early close/trading halt risk, compounding and market volatility risk, emerging markets risk, foreign securities risk, gain limitations risk, high portfolio turnover risk, interest rate risk, intra-day investment risk, inverse correlation risk, leverage risk, liquidity risk, non-diversification risk, shorting risk, tax and distribution risk, tracking error risk, valuation time risk and special risks of exchange-traded funds. Shorting securities occurs when investors sell securities they don't own and are committed to repurchasing eventually.
